Carroburg Livery

The Carroburg Greatswords are one of the most famous regiments in the Empire, with tales of their valour and ruthlessness told from Marienburg To Talabheim. The regiment earned its bloody reputation after the Siege of Carroburg in 1865, where its soldiers successfully defended the walls of their city against the count of Middenland's vast army. Despite the horrific casualties and many wounds they suffered during the battle, the Greatswords fought on resolutely and, by battle's end, their white Reikland uniforms were drenched in blood. From that moment onwards, the Carroburg Greatswords have worn dark red uniforms in remembrance of that bloody battle.

This DLC is small help in the beginning of the game. Gives extra heal potion and two points of attribute. Always something but price is not adequate to its rewards.. Great game, desperately needs an online multiplayer mode.. do a drinking game on every crash and you have fun with this bad mobile phone port.

. The Good.

The maps are just as challenging as DF2 and 3 and thats what matters.

It is well worth buying if you want a challenge.

The Map designs are very GOOD for a TD.

The Bad

NO MUSIC other then title, and menu! You will need a media player and your own songs. The author really needs to go back and add the themes from DF2 and 3 along with volume controls as the machine gun sound is very overbearing in this one just like DF2.

No Keyboard control for the map, no pausing with space, no hellfire with F and no keyboard scrolling. I actually had to map the mouse to a joypad so I could have fast scrolling with the left hand on the maps. Everything has to be done with the mouse in DF1. This is another thing the dev could easily fix for this game since he has Defense force 3 engine finalized he just needs to go back to this and 2 and touch it up. HE is still selling these on steam so theres no real excuse.. Interesting indie mixed adventure-role playing game. It's not a gem and you must forget about it if you are just trying to find a hack and slash title focused mainly on combat and action. Driftmoon is not that kind of game.

This one is more about dialogues and reading a lot (only in English at the moment). Game is full of humor, a little cheesy but wonderful if you (like me) like also these things. I really cant made any complaint about that. You can even feel good or bad for the characters if you are some kind of sentimental person.

I recommend this game. Not for its full price maybe, but its fine with a discount. It gave me like 14-15 hours of fun and some laughs.

The game also is moddable by the community, which is a good thing. There are some mods out there already integrated into the game options menu. And you can make your own ones if you know how to do it.

This is a game with potential. Unique parkour style movement and climbing systems. Reminds me a little bit of Windlands. I can not recommend the game in its current state (early access) however. Teleportation is very bugged, the same goes for NPC dialog, The game has a very unfinished feel overall with constant irritating bugs and limited content. The art style is colorful cartoonish, but the world feels lifeless. Might be worth playing in its finished state, but not as it is right now.. WHY DID I EVEN BUY THIS GAME!!!!!!!!!!!!!!!!!!!!

Cons

-EVETRYTHING!

Pros

-THERE ARE NO PROS!!!!. For those all of you think this game is like 1990 graphics and some typos, true thats true. But dont forget.. Graphics arent matter. Its what gameplay.

Sure gameplay was clonky as hell , but when you got used to it welp you can do all this and also since the Rewarding system is great out of charts, of course some materials is confusing.

Theres some 2011 users who had played this game before they know war thunder... does war thunder has BF 109 B or Dora?

Incase some weaboos WT user want to say : You never played war thunder before dont compare!
"Dont say i never played War thunder before, im level 40 in WT. Don't believe check my steam. "

But i say to developers Fix your typo and some confusement in your description. im giving it 5/10 because of some typos and confusing gameplay.

And also devs its time for you to UPGRADE your graphics since graphic loving weaboos think its some sort of incomplete game of yours HIS dev.

Anyway i think i liked it because before i knew War Thunder.. Some neat views of the planets, but it stutters quite a bit on my beefy rig (6850K SLI 1080's) and the controls weren't consistent (i tried to push buttons and grab the floaty objects, but sometimes it would grab and sometimes it wouldn't).. Unable to run. Crashes to bug report on startup.. Just Neptune.

<https://steamcommunity.com/sharedfiles/filedetails/?id=1614299700>. The epitome of a hidden gem. Eloquent. open gameplay in a retro JRPG turn-based shell. What an absolute delight.. Such a great classic! brings me those days back playing it.
